

Lancashire & South Cumbria Primary Care Training Hub

Hub and Spoke Placements

Learners are allocated to their main area where they will spend most of their time, This placement gives flexibility to learners, allowing them to visit associated placement areas (spokes) for shorter periods of time in other settings and with different clinicians.

The placement gives the learner the opportunity to gain experience in extra settings which may have different specialisms or enhanced services, such as the opportunity to spend time at several practices with staff who offer different clinics.
