We look forward to welcoming you!

CARE
Connected, Authentic
Resilient & Empowered

What is CARE?

CARE is a learning and development programme that empowers Social, Community and Primary Care professionals to play a key role in their primary care network, to shape services based on population health needs and to strengthen their leadership. Focussing on wellbeing and building and harnessing resilience, the programme uses digital technology to connect primary care professionals and to support joined-up, multi-professional working.

CARE's practical and person-centered approach has already led to more joined-up working in primary care networks, bringing together a range of health and social care professionals as a complete care community. This is not only helping with immediate acute care needs but is also supporting patients whose long-term conditions are likely to deteriorate during the COVID-19 pandemic.

System leaders
driving large scale change and inspiring others to do the same

Thought leader
driving innovation and learning through evaluation and sharing best practice

Super-connectors
Across primary and community care for the benefits of the workforce and patients
