

A LIFE JOURNEY PATHWAY PLACEMENT THROUGH HEALTH AND SOCIAL CARE

Primary Care

Learners will work and learn alongside registered health care professionals including:- GPs, Practice Nurse, Practice Manager, Administration Team, Social Prescriber Link Worker, Clinical Pharmacists, Allied Health Professionals - Paramedic, Podiatry or Dietitians. The learners will gain a full understanding of the infrastructure practices provide, this will assist with completing proficiencies and their case study

Social Care

Learners will deliver services, learn and care working for the residents within their nursing home alongside the social care teams. Learners will assist residents with all their daily needs, including medications, observations, and care plans, whilst completing proficiencies and their case study

A 'Real-Life' Case Study

HCRG Care Group

Provides services to children and families. Learners will attend a virtual week covering, 'Holistic approaches to community healthcare'. The week will follow an example of case studies utilising a virtual families. All topics will be explored and related to how we practice healthcare in the community

With the support and guidance from the practice assessor, the learner will identify a person/family, to develop their 'real-life' case study. This will form a structure for the learner to utilise and develop whilst following the pathway. Practice Assessors, supervisors and Lancashire & South Cumbria Primary Care Training Hub (L&SC PCTH) team will support the learners to develop their case study, during learner forums

Learner Forums

L&SC PCTH project manager and the locality GPEFs/Social Care PEFs have an important role and will support, teach, facilitate, coach, and assist with the learners development both clinically and personally. This dedicated team are there to support and guide all practices, assessors and supervisors during this pathway.
