

FCP CLINICAL SUPERVISION TRAINING OVERVIEW

Join us for **Coventry Universities** training session tailored for clinical supervisors overseeing Musculoskeletal (MSK) and Paramedic First Contact Practitioners (FCPs). This **Coventry University** event is designed to equip supervisors with essential knowledge and practices to effectively guide FCPs through their clinical and academic pathways.

- **Introduction to Supervision Roles:** Understand the dual responsibilities of clinical and academic oversight.
- **Core Supervision Frameworks:** Explore the principles of daily, professional, and educational supervision tailored for MSK and Paramedic pathways.
- **Supervision Structure Overview:** Learn about the 13-week module requirements, including reflective sessions and progress mapping.
- **Reflective Practice Workshop:** Participate in group discussions to enhance your approach to guiding FCPs through case studies and reflection exercises.
- **Final Dashboard Preparation:** Gain insights into preparing FCPs for their concluding presentation and the checklist for academic sign-off.
- **Q&A and Resource Sharing:** Wrap up with an interactive session to clarify key points and access further support tools.
