- Quality mechanisms and assurance
- Audit, clinical effectiveness, safe and innovative care delivery
- Service improvement
- Principles and Management of LTC's
- User and carer perspectives, holistic patient centred care
- Delivering evidence-based high quality services

Testimonials

"I have completed both the GPN 1 and GPN 2 module and found both courses beneficial to my role as a general practice nurse. The modules have allowed me to develop my academic writing skills which I feel will help me progress further in my career and the modules are also great opportunity to meet fellow students who are also relatively new to practice nursing. This ultimately also helps to discuss and find methods other practices may use to deliver care which you could utilise in practice or methods which may improve care for patients. The GPN 2 module in particular, taught me the best ways to produce audits which ultimately improves ways in which care can be delivered as well as learning about relevant frameworks which should be utilised by GPNs. I think both modules are beneficial to anyone new to the general practice role."

Rebecca Gee

"Thank you both for all your help and support throughout it. Great course and great teachers."

Rebekah Tweddell
